The first thing that comes to mind when looking at this title, is that it is written by doctor, doctor! And the doctor was not wrong about his first impression. This book has over 100 references to medical journals and journals of dentistry. The book addresses the question of what is man? And the answer to this question will be applicable to all people, regardless of age, race, nationality or religion. So if you are looking for a book that can answer all your questions about life and death, then this is the right book for you. The topics covered in this book are as follows: Definition of Man; The Human Body; General Characteristics; The Specific Functions; Man's Life Span; Problems of Aging and Death. The human body is very complex and unique, but also very fragile. Each section has its own purpose and function within the overall organization of the body. All parts work together to form a complete whole. Every century and every generation looks forward to the next life span. To live longer and healthier. The last century was no exception in this regard. New approaches, treatments and medications were discovered in the 21st century to make people who are supposed to die, come back to life. Longevity is a blessing when it comes to our ancestors, but when it comes to how we look at them, we might find out that they are doing much more harm than good. This book will help you understand why you should take care of your own health before worrying about your parents or grandparents' health or some other elderly relatives.
